Ideation Phase

Empathize and Discover

Team ID	SBAP0030975
Project Name	Visualizing housing market trends: Analysis of sales prices feature using tableau

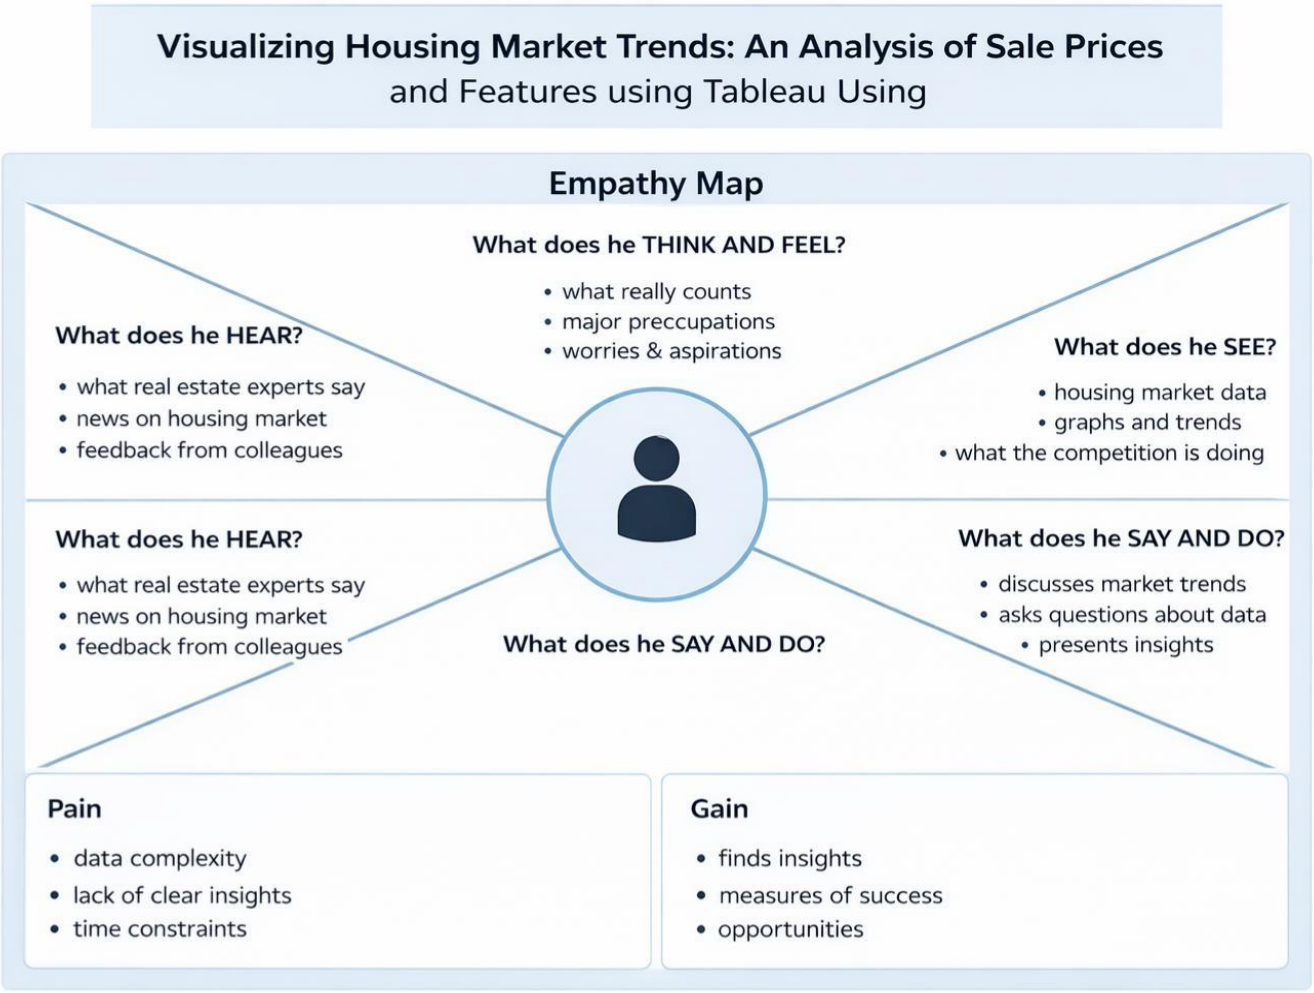
Empathy Map:

The empathy map focuses on real estate analysts, property investors, and decision-makers who rely on data to understand housing market behavior. These users think and feel concerned about fluctuating property prices and want accurate, clear insights that help them make informed decisions. They often feel overwhelmed by large and complex datasets but aspire to identify the key factors that influence sale prices, such as location, size, and number of bedrooms. Their thoughts mainly revolve around three key aspects: what truly drives property value, how market trends are changing over time, and how to minimize financial risk while maximizing returns.

They see housing market data, dashboards, trend graphs, competitor pricing, and economic changes that impact real estate values. At the same time, they hear opinions from real estate experts, news about market conditions, feedback from stakeholders, and client expectations regarding property investments. In response, they discuss trends, ask questions about price variations, analyze features using Tableau dashboards, and present insights in meetings or reports. Their actions are generally centered on three main activities: exploring and filtering data, comparing property features and prices, and communicating insights clearly to stakeholders.

However, they face pain points such as unstructured or inconsistent data, difficulty identifying major price drivers, and time-consuming manual analysis. These challenges can lead to uncertainty and delayed decision-making. Their main gains include obtaining clear visualizations, discovering meaningful patterns, and improving investment decisions. Ultimately, they aim to achieve three important outcomes: accurate forecasting of housing prices, data-driven strategic planning, and increased confidence in real estate investments through interactive and insightful Tableau dashboards.

Example :



Visualizing Housing Market Trends: An Analysis of Sale Prices and Features using Tableau Using
Empathy Map
What does he THINK AND FEEL?
• what really counts
• major preccupations
• worries & aspirations
What does he HEAR?
• what real estate experts say
• news on housing market
• feedback from colleagues
What does he SEE?
• housing market data
• graphs and trends
• what the competition is doing
What does he HEAR?
• what real estate experts say
• news on housing market
• feedback from colleagues
What does he SAY AND DO?
• discusses market trends
• asks questions about data
• presents insights
What does he SAY AND DO?
Pain
• data complexity
• lack of clear insights
• time constraints
Gain
• finds insights
• measures of success
• opportunities
